Malang, East Java, Indonesia

SUMMARY

Front-end developer with over 5 years of experience delivering websites and mobile apps for companies in the Netherlands, the USA and Indonesia. Built product front ends and company websites for two Dutch software companies, Symson and Alumio, led front-end development of Bank Mayapada's banking application, and brought Alumio's company website to a page speed score of 98. Works across React, Next.js, AngularJS, Svelte, Node.js, Laravel and Webflow, and delivers full-stack applications as a freelancer.

EXPERIENCE

FULL-STACK WEB DEVELOPER **INDONESIA**
Freelance (Self-employed) *08/2020 - Present*

- Deliver responsive full-stack web applications from design through maintenance, using JavaScript, React, Node.js and Express.
- Build and maintain the RESTful APIs that connect front-end interfaces with back-end systems.
- Integrate MongoDB and MySQL databases and tune queries and database structure to improve application performance and scalability.
- Partner with cross-functional teams to design and ship user-centered front-end interfaces in React and Vue.js.
- Deploy Node.js and Express server applications with secure, efficient handling of requests and data.

FRONT-END DEVELOPER **ROTTERDAM, NETHERLANDS**
Symson *11/2023 - 05/2026*

- Kept Symson's live website stable and fast by maintaining and optimizing it as part of a 7-person team.
- Turned Figma prototypes into a sales-driven web page designed to raise user engagement and support business growth.
- Built a dynamic ROI calculator with jQuery and Airtable that lets clients quantify the value of Symson's services and supports their decision-making.
- Created the scroll effect animation on symson.com's Algorithm page, reinforcing the brand's visual identity.
- Introduced Tailwind CSS across the website, giving all web pages one consistent design language.

WEBFLOW DEVELOPER **USA**
Paired Recruiting (Freelance) *02/2023 - 10/2023*

- Redesigned and rebuilt Paired Recruiting's homepage in Webflow as the freelance developer on the project.
- Structured a dynamic Webflow CMS so the Paired team manages and updates content on their own.
- Delivered a fully responsive homepage, optimized for performance on all devices and consistent with the brand.
- Built custom Webflow interactions and animations to make the homepage more engaging.

FRONT-END DEVELOPER **GRONINGEN, NETHERLANDS**
Alumio *02/2022 - 10/2023*

- Built the front end of Alumio's Integration Platform as a Service (iPaaS) product with React, Next.js and Node.js in a 12-person team.
- Led development of Alumio's company website and optimized it to a page speed score of 98.
- Designed and built a responsive Webflow landing page aligned with the company's brand identity.
- Extended the website with dynamic, interactive elements in JavaScript and jQuery to increase user engagement.

MOBILE DEVELOPER **YOGYAKARTA, INDONESIA**
PT. Infosys Solusi Terpadu *12/2020 - 05/2021*

- Led front-end development of Bank Mayapada's customer banking application, built with Temenos Kony.
- Collaborated in a 12-person team with back-end developers and business analysts to meet all functional and non-functional requirements.
- Applied user-centered design principles to make the application simple to use and navigate.

FRONT-END WEB DEVELOPER (INTERNSHIP) **JAKARTA, INDONESIA**
PT Finnet Indonesia *07/2019 - 10/2019*

- Delivered the front end of Finnet's corporate dashboard website within a three-month internship, working with experienced developers to meet all client requirements.
- Built a dynamic Laravel front end that lets users access and visualize data from multiple sources.
- Created a responsive CSS and JavaScript interface that works across devices.
